

RODRIGO SANTACRUZ ESPINO

SOFTWARE DEVELOPER

ABOUT ME

I am a software developer focused in creating desktop applications (Windows, MacOS and Linux), mobile applications (Android and iOS). I consider myself a self-taught person who is able to learn anything about the subject.

EXPERIENCE

MIDESC

2018-2019

- Computers were maintained and restaurant automation using arduino microcontrollers.

IFC

2020-2021

- Websocket for getting cryptocurrency's price in real time and storage it in Database to consult in the main application (trading bot).

Robótica

2014-2019

- During my time at middle school I became part of a robotics' team from Vex Robotics platform. After getting my degree, I decided to keep helping the team to strengthen their knowledge and mine.
